Fuel Economy - Used Vehicles

CO₂ emission figures (g/km)

The fuel consumption figure shown is taken from the official test results obtained from this vehicle type when new. It is intended to provide a standard figure for comparing the relative fuel economy of different vehicles of a similar age and condition and does not represent the average fuel consumption that will be achieved on the road. A number of factors not included in the official new vehicle test will affect the fuel consumption achieved on the road including: vehicle age, how it has been maintained, road/weather conditions and driving style.

Fuel cost (estimated) for 12,000 miles: £5414

A fuel cost figure indicates to the consumer a guide price for comparison purposes. This figure is calculated by using the combined drive cycle (town centre and motorway) and average fuel price. Re-calculated annually, the cost per litre as at April 2022 is as follows - petrol 167p, diesel 180p and LPG 83p.

VED for 12 months: £325

Vehicle excise duty (VED) or road tax varies for vehicles registered before the 1st April 2017 according to the CO₂ emissions and fuel type of the vehicle. For vehicles registered after 1st April 2017, they will have a fixed rate charged after the first tax payment. Vehicles with a list price of over £40,000 will also be subject to a supplemental charge for their first 5 years
