## Fuel Economy - Used Vehicles

### CO<sub>2</sub> emission figures (g/km)

The fuel consumption figure shown is taken from the official test results obtained from this vehicle type when new. It is intended to provide a standard figure for comparing the relative fuel economy of different vehicles of a similar age and condition and does not represent the average fuel consumption that will be achieved on the road. A number of factors not included in the official new vehicle test will affect the fuel consumption achieved on the road including: vehicle age, how it has been maintained, road/weather conditions and driving style.

### Fuel cost (estimated) for 12,000 miles: £3674

A fuel cost figure indicates to the consumer a guide price for comparison purposes. This figure is calculated by using the combined drive cycle (town centre and motorway) and average fuel price. Re-calculated annually, the cost per litre as at April 2022 is as follows - petrol 167p, diesel 180p and LPG 83p.

## VED for 12 months: £395

Vehicle excise duty (VED) or road tax varies for vehicles registered before the 1st April 2017 according to the CO2 emissions and fuel type of the vehicle. For vehicles registered after 1st April 2017, they will have a fixed rate charged after the first tax payment. Vehicles with a list price of over £40,000 will also be subject to a supplemental charge for their first 5 years
